The Miracle of Youth Rejuvenation is Now a Dream Come True with VENOBEU® Secret 99

Experience true timeless youth and revival of your intimate life with the help of the world's first patented purified snake peptide technology

KUALA LUMPUR, August 2021 – The secret of youth rejuvenation and well-being has made its way to the shores of Malaysia, promising an experience of true timeless youth for Malaysian women. Introducing VENOBEU® Secret 99, a ground-breaking stem cell technology and patented extraction and purification process of snake venom peptides, compressed into a tiny vial for direct application into the intimate area.

VENOBEU® Secret 99 aims to rejuvenate the uterus to its optimum health at the cellular level, and the effects will manifest throughout the entire being. The skin will gain its once youthful radiance, reduces infections within intimate areas as well as tightens the muscle walls, and lessen urine incontinence. It also helps in balancing the hormones within the body which brings about

better moods and a wholesome health experience.

Unlike supplements, VENOBEU® SECRET 99 is directly applied within the intimate regions. Kimberley Tan, CEO of Medibeu Inc, the sole distributor of the product in the Asia Pacific, explains, “I believe eating well is important for women, and supplements are great! But, how much of these supplements reach the target area to trigger active cell renewal akin to the renewal rate of those younger in age? VENOBEU® Secret 99 effectively reaches target area or concern via an atopic application.”

What encourages cell rejuvenation lies in its ingredients. It is made up of a rich blend of natural, bioavailable polypeptides and plant extracts, all of which are scientifically proven to trigger cell renewal at amazing efficacy. It also enhances collagen production which counters ageing.

Women are affected by ageing which accelerates other health issues. “As we age, our estrogen level drops significantly, and the way our body produces this hormone is affected not only by ageing but also numerous factors such as environment, food intake, stress levels and daily lifestyle,” says Tan. She adds that all these factors, including the declining estrogen levels, will bring on an onslaught of menopausal symptoms at an earlier age. This is where many women suffer silently, unaware that they may have a condition called peri-

menopausal.

“What VENOBEU® Secret 99 can do is to deliver its natural cell-to-cell modulator and neurotransmitter to the target area (the uterus) to trigger renewal and rejuvenation from within,” explains Tan. “In short, users will age gracefully and slowly while enjoying the effects of a younger vitality – healthier, more energetic and enjoying life better than ever before, including the intimate life.

The core ingredient of VENOBEU® Secret 99 is the patented purified snake peptide. While it is known to be venomous generally, the scientists behind this product have successfully extracted Cobrotoxin (CTX Peptides) which, after purification, consist of purified bio-natural peptides that encapsulates the goods of enhancing wellness.

Purified bio-natural peptides component from Cobrotoxin (CTX) is a ligand-gated ion channel binding site with high specificity and high affinity with human alpha-7 nicotinic acetylcholine receptors ($\alpha 7$ -nAChR) allowing an influx of neurotransmitter to navigate Na⁺ channel of damaged or dysfunctional nervous systems, regulate cytokines and ultimately repair and normalise their function.

The patented technology of the entire segregation, extraction and purification process of snake venom is the world's first.

VENOBEU® Secret 99 was first developed in Korea, the beauty hub of the world, with more than 10 years of stringent research and development. Medibeu Inc. acquired the right to bring this miracle elixir to Malaysia in hopes to elevate the quality of life, especially among Malaysian women.

Consumers who would like to experience the treatment can do so at the comfort of their own homes with purchases from local clinics and through their website. They may also do a prior consultation with a doctor before applying the product. Those who would like to enjoy a whole treatment experience of VENOBEU® Secret 99 can also do so at selected clinics under the care of a healthcare professional.

VENOBEU® Secret 99 is a monthly home care treatment packaged in a box of 20 vials of 1ml goodness. Its price is tagged at RM2,600 for a one-month treatment. It is recommended for women of any age, particularly women with hormonal imbalance or suffering from Polycystic Ovary Syndrome, those concerned about ageing or peri-menopausal symptoms, as well as mothers for after childbirth womb rejuvenation.

Tan also welcomes doctors who wish to take on a partnership in distribution or treatment using VENOBEU® Secret 99.

The Motivation Behind VENOBUE® Secret 99

“I really wanted a product that truly brings value to the consumers, and their lit-up faces when they actually see the results,” says Tan. “There are far too many women who suffer silently when they experienced various symptoms within the intimate region and pelvic floor area. Most of them don't know what to do or how to deal with it. Some maybe even are too ashamed to consult a doctor. Some women also may not recognise the signs of peri-menopausal symptoms and may be told that the symptoms are just a part of ageing, and it's something we must accept. In my opinion, that shouldn't be advice we accept and may prevent us from seeking better solutions and professional help in time,” she adds.

She explains that many of these women just simply accepted the symptoms as part of ageing without realising that all these mood swings, tiredness, low libido, frequent vaginal infection are due to not just ageing but hormonal imbalance as well.

“There are solutions to this that can improve the overall quality of life such as managing nutrition intake, managing stress, exercise self-love and many more. What we promote is self-care, self-love, body positivity as well as immediate and effective treatment of these symptoms with VENOBUE® Secret 99,” Tan says.

“A good balance of self-love, body positivity and combination of VENOBUE® Secret 99 treatment will be the bond that tightens our youth and femininity in the long run.”
